

The background is a deep blue gradient with a subtle pattern of white dots. Overlaid on the left side are several concentric circles and arcs in a lighter blue color. Some of these arcs have degree markings, including 40, 150, 160, 170, 180, 190, 200, 210, 220, 230, 240, 250, and 260. There are also small white arrows pointing in various directions, suggesting a sense of rotation or movement.

ACCOMMODATOR

BY GROUP- 25

TEAM – 25 (DEVELOPER TEAM)

- Team Members
 - Fenil Patel
 - Mayank Pandey
 - Pallavi Marni
 - Shaswat Doshi
 - Smit Gor

TEAM - 12

(CLIENT TEAM)

- Team Members
 - Abhinav Singh
 - Alen John
 - Ishan Makadia
 - Sankalp Kulkarni
 - Saumya Shah

SUMMARY

- Our platform provides a seamless and intuitive user experience for students searching for housing options. With our user-friendly interface, students can search for housing options based on various criteria, including location, price range, and other specific preferences such as roommate preferences.
- Our software leverages algorithms to efficiently search and display results to students, ensuring a quick and effortless process.
- To achieve this, our team utilizes technologies such as React, Spring Boot, and MySQL as database, ensuring a robust and scalable solution for our users. We also employ agile development methodologies to ensure efficient and effective project management, ensuring timely delivery of high-quality software.

INTERNAL MEETINGS

- Total Meetings: 52
 - Online: 37
 - In-Person: 15
- Attendees:
 - All members of group 25

MEETING WITH DEVELOPER TEAM AND TA

- Total Meetings: 11
- Attendees:
 - All members of group 25
 - All members of group 12
 - Shathish Annamalai (TA)
 - Ghazal Shobhani (TA)

PROJECT DASHBOARD STATS

Sprint 1
(15 Feb- 25 Feb)

▼ AC Sprint 1 15 Feb – 25 Feb (7 issues)		0 0 0	Complete sprint	...
Need to complete Front end login and registration page with expected home page for final delivery of application. From the backend side Authentication needs to be completed				
AC-16	CRUD APIS - BE	DONE ▼	SG	
AC-9	Student Authentication and Authorization - BE	DONE ▼	FP

LEARNING OUTCOMES

- Learning React and Spring Boot: Able to learn the fundamental concepts of React and Spring Boot, including their architecture, core features, and best practices.
- Full Stack Development: Build a full-stack web application using React and Spring Boot, including integrating the front-end and back-end components and deploying the application.
- RESTful API design and implementation: Learn how to implement a RESTful API using Spring Boot, including creating endpoints, handling HTTP requests and responses.
- Handling code smells and implementing refactoring: Able to identify code smells with the help of Designite in the application code, such as complex conditional, complex methods, etc., and implement appropriate refactoring techniques to improve the code quality and maintainability.
- Testing and debugging: Able to write unit tests for both the front-end and back-end components of the application and use debugging tools to identify and fix issues.
- CI/CD: Able to set up a continuous integration and deployment (CI/CD) pipeline for the application using GitLab.
- Agile Methodology: Able to collaborate effectively with client team members, manage the project using agile methodologies, and use JIRA board for project management and issue tracking.

THANK YOU!
